

## Colligo Rigging Design

Synthetic Standing Rigging Design and Retrofit Engineering Services utilizing Dynex Dux, 12 Strand line.

Complimentary design services for retrofitting and new boat fit out using Colligo Synthetic Systems Standing Rigging Hardware with Dynex Dux, UHMWPE line.

Call or email for more information.

Services include:

- Sizing Dynex Dux, UHMWPE line for your boat based on creep and stretch requirements and predicted loads.
- Design and fitting of hardware interfaces at mast connections and deck fittings, chainplates, etc. All interfaces at Boat/Mast and Synthetic Line are engineered for long term durability, to maximize strength and minimize weight.
- Line splicing recommendations based on service needs. Based on our experience with Dynex Dux we will recommend splicing techniques to suit various load and packaging conditions
- Spreader end Design and Consult. Here we help with the transition to chafe resistant spreader ends fittings or design changes. Some issues can be addressed by modifying existing hardware/spreader ends and others can use our spreader end fittings. We can also custom design fittings for whatever spreader type you have.
- Completed cost comparison of Colligo Synthetic Systems Synthetic Standing Rigging to Stainless wire System.
